2.05

International Journal of

CONTROL

Formerly "Journal of Electronics and Control"

PERIODICAL

Editor: J. THOMSON

UNIVERSITY OF HAWAII
LIBRARY

Editorial Board:

France - -	Professor P. AIGRAIN
Holland - -	Professor H. B. G. CASIMIR
U.K. - -	A. T. FULLER
Germany -	W. KLEIN
U.S.A. - -	J. C. LOZIER
U.K. - -	Professor J. C. WEST

Volume IV. First Series
July 1966 to December 1966

Copyright © TAYLOR & FRANCIS LTD

CONTENTS OF VOL. IV. (Nos. 1–6)

(FIRST SERIES)

NUMBER 1—JULY

Page

Power Imbedding at the Carrier Frequency of Multiple Wave Trains Used in Radar Systems. By T. S. Chen, Radio Corporation of America, Electronic Components and Devices, Harrison, New Jersey 1

The Testing for Optimality of Linear Systems. By B. D. O. Anderson, Stanford Electronics Laboratories, Stanford, California 29

Sensitivity of Optimal Linear Systems to Small Variations in Parameters. By S. Barnett, Department of Mathematics, Loughborough University of Technology 41

A Matrix Formulation for the Time Response of Time-invariant Linear Systems to Discrete Inputs. By E. Huntley, Royal Aircraft Establishment, Bedford 49

A Multiple-input Quasi-linearization Method with Applications. By A. K. Mahalanabis and A. K. Nath, Institute of Radiophysics and Electronics, Calcutta, India 73

A Graphical Technique for Compensation in the z-plane. By D. C. Reddy and L. A. Ware, Electrical Engineering Department, University of Iowa, Iowa City, Iowa 87

Determination of Pulse Transfer Function of Time Varying Differential Equations. By Y. V. Venkatesh, Department of Electrical Engineering, Indian Institute of Science, Bangalore 12, India 97

Correspondence

On "A Note on Non-linearities in Series". By A. K. Mahalanabis and A. K. Nath, Institute of Radiophysics and Electronics, 92 Acharya Prafulla Chandra Road, Calcutta 103

Page

NUMBER 2—AUGUST

The Determination of Periodic Modes in Relay Systems Using the State Space Approach. By J. K. C. CHUNG and D. P. ATHERTON, Department of Electrical Engineering, University of New Brunswick, Fredericton, Canada 105

Optimization Problems in a Class of Systems described by Hyperbolic Partial Differential Equations. Part I. Variational Theory. By R. JACKSON, University of Edinburgh and Heriot-Watt University, Chemical Engineering Laboratories, Chambers Street, Edinburgh 1 127

A New Method of Designing Time-varying, Linear Feedback Systems. By R. L. HAKEN and A. W. NAYLOR, Systems Engineering Laboratory, Department of Electrical Engineering, The University of Michigan, Ann Arbor, Michigan. 137

Design of Non-linear Multivariable Control Systems. By N. VISWANADHAM, H. V. GURURAJA and B. L. DEEKSHATULU, Department of Electrical Engineering, Indian Institute of Science, Bangalore 12, India 153

Optimal Boundary Control for a Non-linear Distributed System. By MORTON M. DENN, Department of Statistics and Computer Science and Department of Chemical Engineering, University of Delaware, Newark, Delaware 167

Insensitivity of Optimal Linear Control Systems to Persistent Changes in Parameters. By S. BARNETT and C. STOREY, Department of Mathematics, Loughborough University of Technology, Loughborough, Leics. 179

Third-order Feedback Control Systems—Their Sign Patterns and Controllability. By A. K. BHATTACHARYYA and A. K. CHOUDHURY, Institute of Radio Physics and Electronics, University of Calcutta 185

NUMBER 3—SEPTEMBER

An Analysis and Evaluation of Signal Dependent Sampling in Discrete-continuous Feedback Control Systems. By K. E. TAIT, School of Electrical Engineering, University of New South Wales, Sydney, Australia..... 201

Output Correlation Function of a Biased Full-wave Limiter. By S. RAUCH, Canadian Marconi Co. Ltd., Montreal, Canada, and M. FUKADA, Department of Electrical Engineering, McGill University, Montreal, Canada 241

67 94093
TJ 212
I 55
v. 4

Page

Harmonic Response and Jump Phenomena in Forced Non-linear Systems. By I. S. N. Murthy and G. Krishna, Department of Electrical Engineering, Indian Institute of Science, Bangalore 12, India 247

Some Considerations in Formulating Optimal Control Problems as Differential Games. By I. G. Sarma and R. K. Ragade, Department of Electrical Engineering, Indian Institute of Technology, Kanpur, India 265

Further Consideration of an Optimal Control Problem. By D. H. Zachary, Department of Mathematics, Memorial University, St. John's, Newfoundland 281

NUMBER 4—OCTOBER

Further Sampling Interval Criteria and their Evaluation in Discrete-continuous Feedback Control Systems. By K. E. Tait, School of Electrical Engineering, University of New South Wales, Sydney, Australia 297

Analysis of Systems with Backlash and Resolution. By Indhu Ramu and B. L. Deekshatulu, Department of Electrical Engineering, Indian Institute of Science, Bangalore 12, India 325

Analysis of Time Delay Systems. By Y. V. Venkatesh and B. L. Deekshatulu, Department of Electrical Engineering, Indian Institute of Science, Bangalore 12, India 337

Finite Time Optimization of Bang-bang Control Systems. By D. H. Zachary, Department of Mathematics, Memorial University, St. John's, Newfoundland 357

On a Method of Decomposition of Boolean Functions into Unate Functions for Synthesis with Threshold Logic Elements. By Debabrata Sarma, Sunil Ranjan Das and A. K. Choudhury, Institute of Radio Physics and Electronics, University of Calcutta 365

Book Notices 395

NUMBER 5—NOVEMBER

Dynamic Control Study for a Solar Mirror Aboard a Space Craft. By Earl D. Eyman, Electrical Engineering Department and Mechanical Engineering Department, University of Iowa 397

Page

On the Determination of Sub-goals in Self-organizing Systems. By Adrian N. Vladcoff, Department of Electrical Engineering, University of Adelaide, Adelaide, South Australia 413

Describing Function for Two Non-linearities Separated by a High-pass Filter. By B. L. Deekshatulu and Indhu Ramu, Department of Electrical Engineering, Indian Institute of Science, Bangalore 12, India.. 421

Analysis and Design of Second-order Demodulation Type Compensating Networks. By M. P. Dave and B. L. Deekshatulu, Department of Electrical Engineering, Indian Institute of Science, Bangalore 12, India.. 429

Stochastic Optimal Control with Noisy Observations. By R. E. Mortensen, Department of Aerospace Engineering Sciences, University of Colorado, Boulder, Colorado 455

On Connectedness and Trees of an N-graph. By Triptimoy Mukherjee and Pranab Kumar Sarkar, Department of Mathematics, Vivekandanda College, Calcutta-8 465

Book Notices 499

NUMBER 6—DECEMBER

On the Application of the Lyapunov Method to Synchronous Machine Stability. By F. Fallside, Engineering Laboratory, University of Cambridge, and M. R. Patel now with English Electric Company Limited, Nelson Research Laboratories, Stafford 501

A Method for Testing and Realization of Threshold Functions through Classification of Inequalities. By A. K. Choudhury, Debabrata Sarma and Sunil Ranjan Das, Institute of Radio Physics and Electronics University of Calcutta 515

Sub-optimal Time-variable Feedback Control of Linear Dynamic Systems with Random Inputs. By Sven Axäster, The Institute for Optimization and Systems Theory, The Royal Institute of Technology, Stockholm 549

Process Identification and Adaptation by High Frequency Sinusoidal Test Signal. By H. V. Gururaja and B. L. Deekshatulu, Department of Electrical Engineering, Indian Institute of Science, Bangalore 12, India 567

Page

Optimization Problems in a Class of Systems Described by Hyperbolic Partial Differential Equations. Part II. A Maximum Principle. By R. Jackson, University of Edinburgh and Heriot-Watt University 585

Research Note:

Determining the Transfer Functions for Systems with Varying Parameters. By Y. V. Venkatesh, Department of Electrical Engineering, Indian Institute of Science, Bangalore 12..... 599
